### **EMERGENCY MEDICAL INSTITUTE EMT-CC to PARAMEDIC BRIDGE COURSE ONLINE DIDACTIC PROGRAM**

**INSTRUCTOR COORDINATORS** : Gerard Sikorski  
**OFFICE HOURS** : By Appointment, through GoToMeeting or Skype  
**LOCATION OF OFFICE** : 1979 Marcus Avenue, Suite 101  
**OFFICE PHONE** : (516) 396-6150  
**OFFICE FAX** : (516) 396-6171  
**EMAIL ADDRESS:** : [gsikorski@northwell.edu](mailto:gsikorski@northwell.edu)

#### **GENERAL INFORMATION**

Director, EMI : Anthony Conrardy, MBA, MA, EMT-P, CIC  
Office Phone : (516) 396-6501

Course Sponsor Administrator : Edward Waldron, BS, EMT-P, CIC  
Office Phone : (516) 396-6441

VP/Administration : Dr. Jennifer Saleta, Ed.D.  
Medical Director : Dr. Michael Cassara, DO

Program Information  
NYS Course Number : #240002  
Start Date : February 15<sup>th</sup>, 2019  
Practical Skills Examination : To be determined  
NYS Written Examination : February 20, 2020

## **PROGRAM GOAL:**

Within a timeframe set forth by the New York State Department of Health Bureau of EMS (NYS DOH BEMS), the goal of this program is to build upon previously established and administered EMT-Critical Care curriculum, and will address identified gaps in both didactic and psychomotor objectives, in an effort to bridge currently certified EMT-CC's to the EMT-Paramedic level in New York State.

## **COURSE DESCRIPTION:**

This program is approved by the New York State Department of Health Bureau of Emergency Medical Services (NYS DOH BEMS), and addresses information and techniques currently considered to be within the scope of practice of the Paramedic as per the National Educational Standards, and Instructional Guidelines. This course will be conducted in accordance with New York State Standards, Policies, Procedures, and Guidelines. All course records will be retained in compliance with New York State Department of Health requirements.

The following three components must be completed successfully to bridge from EMT-CC to Paramedic:

1. The Northwell Health bridge program is a web-based didactic instruction consisting of:
  - Web-based Lectures
  - Quizzes
  - Case Studies
  - Videos
  - Module Exam Prep
  - Formative and Summative Assessments
  
2. Participating local ALS Course Sponsors will provide:
  - Proctored Unit Examinations
  - Practical Skills Labs
  - Optional Practical Skills Exam Preparation
  - New York State Practical Skills Exam
  
3. Students, who successfully complete all requirements of this program, will be eligible for the NYS written certification examination. NYS examinations will occur at designated Regional Testing Sites.

In accordance with [NYS DOH BEMS Policy 13-01](#), this program is not accredited, and as such, students will not be eligible for National Registry examinations.

## **COURSE OBJECTIVES:**

This program has identified knowledge gaps that exist between the current EMT-CC and Paramedic curricula, and will deliver learning based on these identified areas. Upon program completion, students will have satisfied the objectives set forth by the [National Emergency Medical Services Educational Standards](#)

## **REQUIRED TEXTBOOKS AND OTHER MATERIALS:**

Northwell Health has arranged through the publisher, a discounted bundle for textbooks and support materials required for this course. Please utilize the links below to access and purchase these items in advance of your course start:

CC to Medic Bridge Bundle ISBN: [978-1-284-17760-2](#) is \$791.21 and contains:

1. Nancy Caroline's Emergency Care in the Streets Eight Edition with Premier Access (ISBN# 978-1-284-137279)
2. ECG Cases for EMS (ISBN# 978-1-4496-0918-4)
3. Fisdap Assessment Package: Paramedic (includes Comprehensive Exams, Unit Exams & Study Tools (ISBN# 978-1-284-13197-0))

CC to Medic Bridge Bundle ISBN without textbook: [978-1-284-18130-2](#) is \$482.21 and contains:

1. Caroline Emergency Care in the Streets with Premier (NO TEXTBOOK, ON-LINE ACCESS ONLY) (ISBN# 978-1-284-13721-7)
2. ECG Cases for EMS (ISBN# 978-1-4496-0918-4)
3. Fisdap Assessment Package: Paramedic (includes Comprehensive Exams, Unit Exams & Study Tools (ISBN# 978-1-284-13197-0))

***Students are required to purchase their own books/materials.***

## **COURSE STRUCTURE:**

This is a web-based course that will require a significant degree of discipline and self-directed learning to achieve a successful outcome. This course will follow a rigid timetable. Students failing to complete required course work within the prescribed timeframes will be dismissed from the program.

Each unit is comprised of materials that are contained within the National EMS Education and Paramedic Instructional Guidelines. It is presented with the expressed purpose of bridging the knowledge gaps between the New York State Emergency Medical Technician-Critical Care curriculum and the National EMS Paramedic Education Standards. ***It should be clearly understood that each unit is not a comprehensive presentation of all paramedic-level material on a specific topic.*** Students are responsible for knowing and reviewing all topic materials up to and including the current Emergency Medical Technician-Critical Care (EMT-CC) curriculum.

Students shall be guided through each unit, completing learning modules with activities, and having their knowledge evaluated with formative and summative assessments. Once students have completed all activities and assessments for a specific unit, they must complete a comprehensive summative assessment of the unit topic material through an external examination platform (Fisdap). The assessments, as part of the online course, are intended to only evaluate the student's knowledge of the bridge (gap) material. The external summative assessment is intended to evaluate the student's base knowledge within the context of the entire National EMS Education Guidelines.

Evaluation/assessments include the following:

- Learning module quizzes & case studies.
- Topic area quizzes.
- FISDAP Unit Examinations.
- FISDAP Course Final Examination.
- Successful completion of all web based course objectives

### **COURSE EVALUATIVE ASSESSMENTS/PROGRAM PROGRESSION:**

This course is rigidly structured to ensure that all students progress as an entire cohort through the program. Though students may elect to work faster through a specific module, there is little opportunity for students to fall behind and still remain in the program. The syllabus schedule has identified start and end dates for each activity that will be continuously monitored by the course instructor coordinator. Should a student start to fall behind within a module, the student should expect to receive warning notifications from the CIC that they are at risk of failing to complete the activities in time for the scheduled FISDAP Unit examination.

The course assessments and evaluations are as follows:

- Module Quizzes-placed within a module to assess knowledge after completing learning activities. Minimum passing grade on all quizzes is 100%. The student has unlimited attempts at the quiz, but must be completed before moving on to the next scheduled learning activity.
- Module Final Examinations/Assessments-placed at the end of a module to assess entire breadth of knowledge contained within a module. Minimum passing grade on all module final examinations/assessments is 80%. The student has unlimited attempts at the module final examination, but must be completed before being permitted to take the scheduled FISDAP Unit Examination. ***Failing to successfully pass the Module Final Examination by the specified end date will result in the student being dismissed from the program.***
- FISDAP Unit Examinations-placed at the end of the module to assess the entire breadth of knowledge of the entire topic area, to include previously learned material (EMT-CC Curriculum) as well as the “gap” material contained within the module learning activities. The FISDAP Unit examinations cover the following topic areas:
  - Operations
  - Medical
  - Airway
  - Special Patient Populations
  - Cardiology
  - Trauma

A FISDAP Unit Examination does not exist for the Pathophysiology Module, and students need only pass the Module Final Examination to progress to the next module. The minimum passing grade on all FISDAP Unit Examinations is 70%. Students failing to pass the FISDAP Unit Examination on the initial attempt must schedule a second attempt within one week of the start of the next module. ***Students failing to pass the FISDAP Unit Examination after two attempts shall result in dismissal from the program.***

- FISDAP Paramedic Comprehensive Examination-placed at the end of the course in Module 8 to assess the entire breadth of paramedic knowledge. The minimum passing grade on the FISDAP Paramedic Comprehensive Examination is 70%. Students failing to pass the FISDAP Paramedic Comprehensive

Examination on the initial attempt must schedule a second attempt within one week of the scheduled end date of Module 8. ***Students failing to pass the Fisdap Paramedic Comprehensive Examination after two attempts shall result in dismissal from the program.***

### **TUITION REFUND POLICY:**

Tuition refunds will be granted according to the following schedule:

- Greater than 5 business days prior to course commencement 100% returned\*
- Within 5 business days of course commencement: 90% tuition returned\*
- 15 days beyond course commencement 75% returned
- 30 days beyond course commencement 50% returned
- 45 days beyond course commencement 25% returned
- After 45 days, no portion of the tuition is returned

\* A \$30 service fee will be assessed for any tuition payment remitted by debit or credit card.

### **POST-PROGRAM TUITION REIMBURSEMENT:**

There is an opportunity for students to receive reimbursement for their \$1500 program tuition. Upon successful completion of the New York State Written Examination, and obtaining certification as a Paramedic, the student may have their EMS agency submit a reimbursement voucher to the New York State Department of Health, Bureau of EMS, in the amount of \$1500. The funds will be dispensed to the EMS agency, who will then be responsible for disbursing the funds back to the student. This process is handled specifically by the student and the EMS agency with New York State, and Northwell Health is not part of this transaction. The student is only reimbursed for the tuition cost, and not the cost of the required course materials.

### **CLINICAL EXPERIENCE OBJECTIVES:**

None for this course.

### **FIELD EXPERIENCE OBJECTIVES:**

None for this course.

### **EMT CERTIFICATION:**

Students must maintain NYS EMT certification, or higher, throughout the program. If at any time during the program the certification expires or is suspended, the student shall be dismissed from the program.

### **PROGRAM SYLLABUS REVISIONS:**

The program syllabus may be revised at any time to facilitate the progress of the students. Should a syllabus revision be necessary, and amended copy of the program syllabus shall be sent in electronic format to each student.

## **STUDENT BEHAVIOR:**

Students shall conduct themselves as professional and responsible adult learners. Use of a personal electronic device is permitted provided the device is being used to further student education. Students are prohibited from possessing or utilizing any electronic (or similar) device while taking examinations.

**A student who fails to complete any portion of their required web based course work will not be allowed to continue in the program.**

Administration, Faculty, and any other Support Team Members will be afforded the utmost respect and courtesy at all times.

## **STUDENTS WITH DISABILITIES:**

The Americans with Disabilities Act allows people with certain types of disabilities to request an accommodation for the New York State written certification examination. This may be accomplished only after providing proper documentation of their disability. *See Reference D for NYS DOH BEMS ADA Policy.*

To preserve the rights of all students, an Instructor cannot discuss or screen for disabilities or consider addressing any potential disabilities before a student's admission to a training program. An inquiry cannot be made of a prospective student about any disability. Any student who wishes to request a disability accommodation must contact the NYS BEMS Central Office at: (518) 402-0996. Contact should be made as soon as possible, but not later than eight weeks before the State certification examination.
